

The University of Mississippi School of Education has not made a determination on whether our education degree programs meet the licensing requirements of states, territories or entities outside of Mississippi. Reciprocity of a Mississippi teaching license is determined by individual states and entities.

Teacher candidates wishing to teach in other states are encouraged to contact those state departments of education to determine licensure requirements. All pertinent information in our “Undergraduate Licensure Corner” is specific to Mississippi licensure guidelines. Please note that we strongly encourage our teacher candidates to seek Mississippi licensure; our degree programs in education are nationally accredited.

Should a graduate decide to apply for licensure in another state and need an “institutional recommendation” form completed for that state application, you may email Dr. Whitney Webb at [whitdt@olemiss.edu](mailto:whitdt@olemiss.edu) to assist you with this process.
